Call For Papers

The First National Conference on Pure and Applied Mathematics (NC-PAM 25) aims to bring together professors, researchers and PhD students to explore and strengthen the connection between theoretical and applied aspects of mathematics. Pure Mathematics focuses on abstract structures and foundational theories, while Applied Mathematics addresses practical problems across various scientific and technological domains, the two are deeply interconnected. The conference seeks to highlight this interplay by presenting recent advances in areas such as Analysis, Topology, Algebra, Geometry, Number Theory, Functional Analysis, Operator Theory and Dynamical Systems within Pure Mathematics, alongside developments in Numerical Analysis, Partial Differential Equations, Optimization, Probability and Statistics, as well as interdisciplinary applications in Physics, Computer Science, and Actuarial Science. Through diverse sessions, the event will encourage collaboration, exchange ideas and share research results on recent developments across mathematical disciplines.

Conference Topics

1. EDP and Functional Analysis.
2. ODE and Dynamical Systems.
3. Algebra and Geometry.
4. Numerical Analysis and Simulation.

Presidents of the Conference

Honorary Chairman

**Pr. Ali Boukaroura, Director of Teacher Education
College of Setif**

Conference Chair

Dr. Akram Boukabache

Organizing Committee
